

DURAN® HPLC RESERVOIR BOTTLE GL 45

with conical base

- DURAN® reservoirs feature one central cavity for the inlet filter to allow the **most efficient delivery** of mobile phase to high-performance liquid chromatography (HPLC) analyzers.
- The conical bottom reservoirs allow a greater recovery of solvent, without having to tilt the reservoir and risk a solvent spill.
- On the two larger sizes, the central cavity can accommodate magnetic stir bars for improved mixing.
- Side vent / drain hole in the base for ultrasonic bath degassing, or water drainage after cleaning.
- Retrace Code and certificate for manufacturing lot traceability.
- Made from borosilicate glass conforming to USP Type I and ASTM E438, Type I, Class A requirements.
- **Note:** Bottle is provided without cap! Please order cap separately.
